ABOUT ME

Dedicated and determined person working as a Junior Java Developer at Exactpro, seeking to gain more experience and deepen my knowledge in Web Development. I am a 2nd year student learning at Kutaisi International University (KIU), trying to maintain a 4.0 GPA while keeping a golden ratio of gaining both theoretical and practical knowledge as a computer scientist and a developer. Programming is my passion, which gives me the ability to develop my skills and be enthusiastic towards competitive programming, solving challenges on Hackerrank and Codewars, earning badges and certificates as I reached top 100 people in Algorithms section within Georgia

SKILLS

Languages & Tools:

Java, Python, JavaScript, HTML, CSS, Ocaml, C, C#, MS SQL, PostgreSQL, MariaDB, JSF, ExtJS, SASS, jQuery, WebSockets, REST, Tomcat, Gradle, Flyway, Git, Docker, Linux

Experience:

Worked with tools like Websockets, threads, Tomcat, Log4j, Hibernate, SQL Server, Flyway to utilize web application together with ExtJS, JSF & PrimeFaces, working on MVC and MVVM architecture patterns. Used frameworks such as Spring MVC & Boot, Persistence, jQuery, SASS, Bootstrap for responsive web design, Prior experience with Adobe Photoshop and Illustrator

PROJECTS

Portfolio

Responsive Website with HTML, SASS and jQuery managed by Spring Boot application showing information about me, my projects and an email form for contacting me that sends your message to my personal email address after submission

Trading Platform

Simple website with user system where each user can put sell or buy orders which if matches are traded and/listed. Application uses JavaEE Websockets and Endpoints for connections, a message transit system for independent services, PostgreSQL with Persistence for market items, Log4j2 for logging and Apache Tomcat with Gradle

KIU REST API

REST API with Spring Boot and Spring JPA, using MariaDB with Flyway for migrating

Swing applications with GUI

Bank ATM - uses Java JDBC library to connect to the PostgreSQL database for storing, updating and fetching data with login/registration system

Calculator - supports all basic operators and gets keyboard input

Chat - uses Sockets And Threads for P2P connections and message exchange
